

# SAP Test Data Migration Server

TELESTO SERVICE OFFERING

## ABOUT TDMS

SAP Test Data Migration Server is a high-speed data extraction tool that populates your development, test, quality assurance and training systems with SAP business data from your live productive environment. SAP TDMS enables you to create small, easy-to-use test environments with consistent, relevant extracts of real business production data.

## BUSINESS CHALLENGE

All companies are challenged when creating, refreshing, and maintaining nonproductive environments for development and testing, battling inefficiency and increasing costs.

- Large and quickly growing SAP systems with increasing costs of infrastructure and maintenance?
- Need to test and validate your in-house developments early on with real business data?
- Challenge to scramble sensitive data in DEV, QA, TRN systems?
- Multiple parallel IT projects affecting various departments with diverse project timelines?
- Demand to simulate new business situations?

## THE VALUE

**REDUCTION OF INFRASTRUCTURE EXPENDITURES:** Reduce your disk space up to 70% in Non-prod systems.

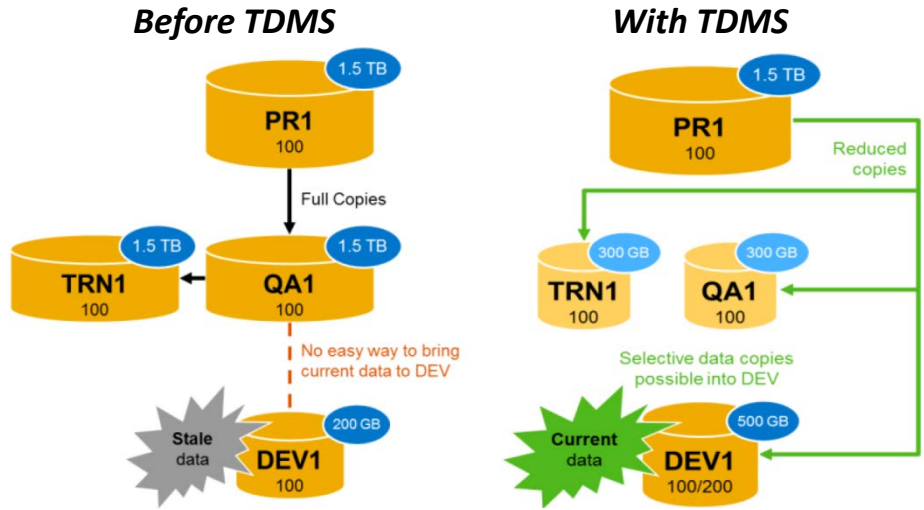

**IMPROVED QUALITY:** Increase refresh frequency by 65% with up-to-date test data for DEV, QA, and TRN systems

**INCREASED EFFICIENCY:** reduce Basis support up to 80% and refresh time by 50% for DEV, QA, and TRN systems

**HIGHER FLEXIBILITY:** Support multiple projects with separate refreshes.

**DECISION SUPPORT:** simulate new business situations or issue resolution

## SAP System Landscape

SAP® TDMS can enable you to create/refresh nonproductive systems with production data sets to reduce your environment by nearly 70%.

## GETTING STARTED

**2 Day – TDMS Workshop covering:**

### TDMS Introduction

- TDMS concepts
- Best practices
- Implement methodology

### Current system landscape

- SAP applications in use
- Industry solutions
- DEV, QA, TRN systems

### System refresh

- Procedures
- HW setup
- Frequency/Issues

### Release and project planning

- Current project planning
- Current release cycles
- Support/Defect Handling

### Testing processes

- Test strategy/tools
- Plan/data provisioning
- TDMS expectations

## PROJECT AT A GLANCE

### 4+ weeks - Implementation

- TDMS install
- Customer Specific Scenario
  - Shell Create
  - Time Slice
  - Data Scramble
  - Data Reduction
- 2-cycle validation test review
- Knowledge Transfer
- Go-live Support

## WHY TELESTO GROUP

- 15+ years of SAP experience
- 100+ TDMS implementations
- Selected partner with SAP Global Testing Group

*“SAP® TDMS software is a powerful tool which helps us reduce disk space and SAP® basis resources while improving the quality of data available in our nonproduction environments for DEV, QA, and TRN activities.”*

*Client IT Director*
