

SAP Landscape Transformation

Cost effective SAP instance and SAP consolidations of organizational units, mergers and splits

Powered by Telesto Group

What is SAP LT?

SAP Landscape Transformation is a powerful and proven set of SAP-provided technologies for conversions and migrations to guarantee performance optimized procedures, ensure complete historical data, provide security mechanism to prevent data loss and business disruption, and increase your business agility.

Leverage Sell, Buy, and Restructure

... buy or sell another company, or even carry out reorganizations

Unify and Transform Data

... need trustworthy data due to data governance initiatives or have distributed master data?

Consolidate and Reduce IT Costs

... centralize or streamline system landscapes

Key Business Challenges:

- Manage the mergers and acquisition in SAP
- Carve outs of plants and companies in SAP
- Outsourcing of processes in your SAP system
- Reorganization of internal org units, including company codes, plants, profit centers and more
- Data analysis and harmonization projects
- Consolidation of SAP clients

Telesto Value:

- Standard methodology for transformation - Step-by-Step to success
- Trained and certified data and system experts
- Average 15+ years of SAP multiple project exposure
- Strong ties, contract and lease agreement with SAP for technology and product support
- Turn-key solution: Software, methods and service
